

NCR Hotel

Want to provide your guests with more of what they want?

YES

Give your guests more time

Streamline guest check-in at your hotel or resort lobby while delivering the unsurpassed speed and reliability only an NCR self-service solution can provide. The NCR Hotel solution is a comprehensive hardware and software package that supports end-to-end guest needs, including hotel and airline check-in, reservation modifications and check-out within minutes.

- **Enhance labor support**

Improve labor productivity by moving your employees away from the front desk to other critical areas of guest services to complete essential duties.

- **Boost your bottom line**

Multiply your return while making guests happy with the option to upgrade room selection, including preferences.

- **Enrich your guests' experience**

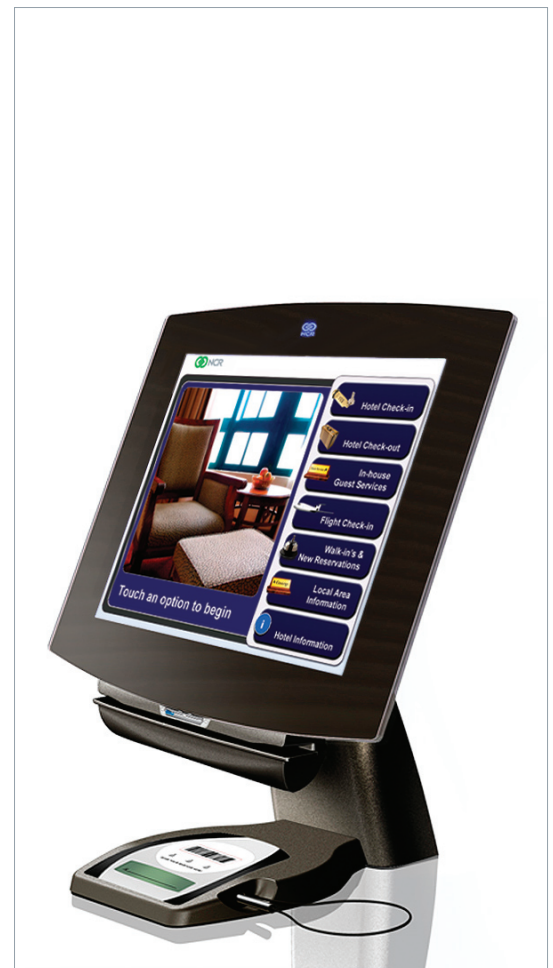

NCR Hotel improves customer service by providing faster check-in/out and shorter lines. This intuitive self-service solution allows guests to confirm reservations, obtain room keys and print their folio in under a minute in most cases.

- **Increase customer loyalty**

Studies show consumers are more likely to choose a property that offers the ability to check in and out via self-service over ones that do not. Stay competitive and ahead of others with state-of-the-art hardware and software technologies that exceed growing consumer demand for self-service convenience.

- **Extend guest flexibility**

Offer guests same-day flight check-in via the integration of our NCR CheckInHere solution. Supporting multi-airline check-in capabilities, NCR CheckInHere facilitates boarding pass issuance from a single location: your lobby.
